Latex Statement

The specification for the Hollister product listed below **does** include natural rubber latex as a component; our suppliers **do** add natural rubber latex as a part of the production process.

Breast Pump **617659**
Pressure Gauge Kit

If a Hollister product(s) found in this catalog is not listed above, the specifications for that product(s) and packaging does not include natural rubber latex as a component, and our component suppliers do not add natural rubber latex part of their production process.

Availability Notice

This product catalog represents products that may not be available in all countries. Check with your local retailer or distributor for availability.

Our Beginnings

Committed to improving the quality of life.

Hollister Incorporated is committed to improving the quality of life and adding value to healthcare worldwide. Through every line of our company's products including MotherBaby Care, Ostomy, Urologicals, Wound Care and Risk Management – the overriding goal and commitment is to make a difference – to add value and improve the quality of life for the people who use our products.

Our founder, John Dickinson Schneider, established his company in Chicago in 1921 as a printing shop later called JDS Printer Craftsman, Inc. The company was built on a solid reputation for quality and service. His underlying principle was “Only First Class is Good Enough” and that principle carried over into a philosophy of quality products, quality service and quality people.

MotherBaby Care

For over 80 years Hollister has offered quality products for mothers and babies. Beginning with heirloom quality birth certificates, Hollister began its journey in the development of new and innovative MotherBaby Care products. Early in this journey, a need for a patient identification (ID) system that could be used throughout the hospital was recognized and a product line was developed. The innovative Ident-A-Band Patient Identification Bracelet set the standard for patient ID in North America.

Soon after the ID band came to market, Hollister went on to develop the Dry Plate FootPrinter to help delivery room nurses make clear, reliable prints of the newborn's feet. Other Labor and Delivery products followed including hospital signage systems, the PlastiBell Circumcision Device, the AmniHook Amniotic Membrane Perforator and a medical documentation system. Perhaps the best-known Hollister obstetric product, the Double-Grip Umbilical Cord Clamp, has since given more than 100 million babies a healthy start in life! Each one of these obstetric products have helped the name Hollister become synonymous with quality products designed to simplify and improve the Labor and Delivery experience for both healthcare professionals and new families.

In the late 1990's, Hollister broadened the MotherBaby Care portfolio to include the well respected breastfeeding products and accessories sold under the Ameda brand. With women facing time constraints and tight work schedules, Ameda products help nursing mothers return to their active lifestyles by making it convenient and comfortable to continue providing their babies with breast milk. This was a natural fit with the already flourishing obstetrics line of products and allowed Hollister to move forward in the birth experience continuum.

Today, we are proud of our history and enthusiastic about our future. With every new product we continue our tradition of innovation with our pursuit of quality. With such a diversity of MotherBaby Care products, we are proud to be helping so many mothers and babies get off to a good start.

Birth Products

Accept no substitutes.

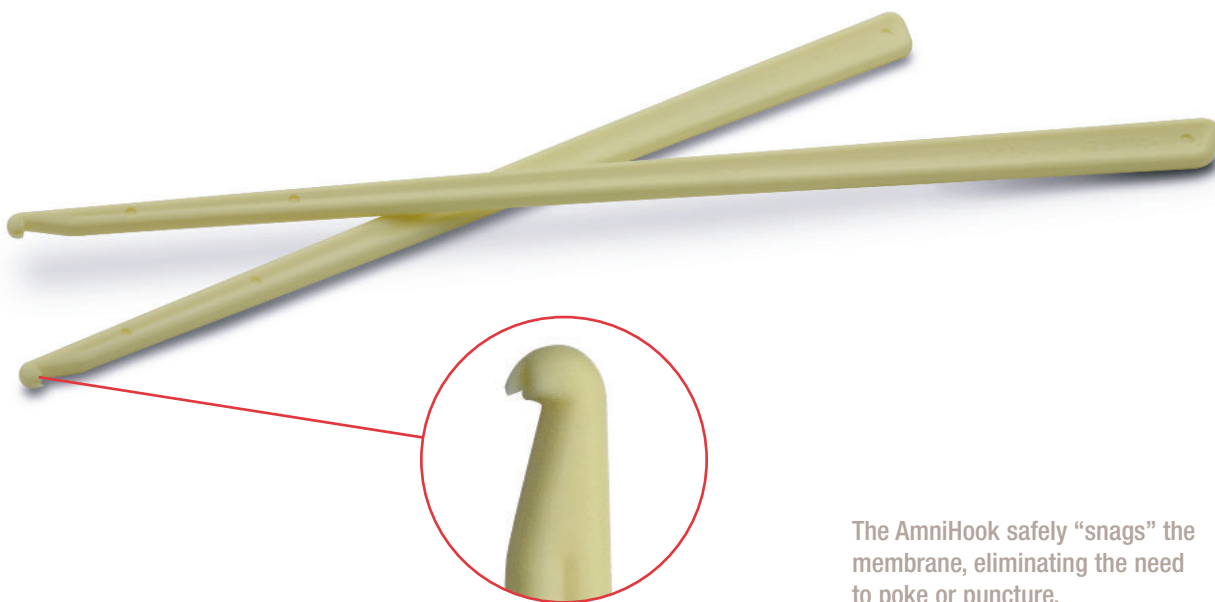

From the very first heirloom quality birth certificate to our new and improved Mother/Baby Father ID band, the Hollister Traditional Obstetrics Products have repeatedly assured medical professionals of the best quality of care for the families they serve. All of Hollister's products must go through world class quality inspection which virtually guarantees a perfect product every time.

Hollister has been in the Labor and Delivery suite for over 80 years and has assisted in the birth of well over 100 million babies. Hollister's commitment to safety and quality continues to be trusted each and every day by medical professionals worldwide and is unrivaled by other brands of traditional obstetric products. So we ask, **"Why take a risk?"** With Hollister Traditional Obstetric Products, you can count on the quality we have stood behind for years.

Amniotic Membrane Perforator

The first time, virtually every time.

The AmniHook safely “snags” the membrane, eliminating the need to poke or puncture.

AmniHook Amniotic Membrane Perforator

Our **AmniHook** Amniotic Membrane Perforator provides physicians with a safe, comfortable method to rupture the amniotic membrane the first time, virtually every time. Each AmniHook must pass through our rigorous, laser vision inspection system to ensure the first AmniHook will be the only one required for the procedure.

- Rounded tip and protected point designed to rupture the amniotic membrane without injury to mother or fetus.
- Disposable, pre-sterilized, individually packaged for convenience.
- 10" long, with molded sides ensure a non-slip grip and precise control.

AmniHook Amniotic Membrane Perforator

Description	Unit of Sale	Stock No
Sterile Membrane Perforator	100 each/box	9601

Tried, true and 100% tested.

Double-Grip Umbilical Cord Clamp

Since 1958, the **Double-Grip** Umbilical Cord Clamp has given over 100 million babies a healthy, safe start in life! This precision-engineered cord clamp has earned its reputation for perfection. Our innovative laser vision inspection system verifies that only clamps meeting 100% of our criteria will make their way to the Labor and Delivery room.

- Safe, disposable, easy-to-apply.
- Dual gripping surface prevents slipping during application.
- Maintains tight seal and applies constant pressure on any size cord as it shrinks.
- Hinge guard confines cord between serrated jaws to eliminate movement.
- No rough edges to snag clothing or get caught on bed linen.

Double-Grip Umbilical Cord Clamps and Clippers

Description	Unit of Sale	Stock No
Umbilical Cord Clamps		
Sterile Cord Clamp	125 each/box	9423
Non-Sterile Cord Clamp	250 each/box	9411
Cord Clamp Clippers		
Single Clipper	1 each/box	9441
Bulk Clippers	25 each/box	9445

Cord Clamp Clipper

Designed to work with our **Double-Grip** Umbilical Cord Clamp, our Clipper safely cuts through the specially designed clamp hinge for easy removal from baby.

- Concealed cutting surface eliminates risk of sharp or pointed objects near baby.
- Single patient use only to prevent risk of cross-contamination.

No special post-operative care required.

PlastiBell Circumcision Device

In today's fast paced medical environment, a circumcision procedure requiring no special post operative care or dressing means a significant savings in both time and money.

The disposable **PlastiBell** Circumcision Device eliminates the need for repetitive and costly sterilization required of stainless steel clamps. No chance of lost or mismatched parts that often render other clamps unsafe or unusable.

- Clear, plastic construction provides visual access at all times.
- A clean line of excision; helps to promote rapid healing.
- No special dressings required.
- Sterile, individually packaged in six sizes and assortment packs.
- Circumcision Trays also available (see page 6).

Perfect prints every time.

Disposable FootPrinter

A baby's footprints can provide a positive means of newborn identification, but only if the prints are clear and readable. Our disposable **Hollister FootPrinters** are designed to produce perfect prints every time. Over-inking is virtually impossible with our unique **Ready-Rolled** ink process that allows for just enough ink for two baby footprints and one mother's fingerprint. These footprinters require such minimal space that 1,250 plates can be stored in a single cubic foot.

- Disposable plastic plate fits easily in the palm of one hand.
- 4-1/2" x 2-3/8", less than 1/8" thick with stackable edges for easy, compact storage.
- Non-toxic, black ink – easy to see and wash off of baby.
- Great for official identification forms, **Hollister Birth Certificates** and hospital made mementos.

Disposable FootPrinter

Newborn Identification Forms

Retain the finest details.

Newborn Identification Forms

The paper used to record a footprint has a great deal to do with the clarity and overall quality of the prints. Our Hollister **Newborn Identification Forms** are pre-printed on high contrast, archival quality paper, perfect for both receiving and preserving infant footprints. When used with the disposable **Hollister FootPrinter**, the Newborn Identification Forms assure the hospital of dependable, readable newborn identification to link mother and baby.

- Receives and retains every detail of a baby's tiny skin print.
- Space for recording pertinent birth information and verifying signatures.
- Enough space for two infant footprints and a mother's fingerprint.
- Some forms allow for the attachment of infant's ID band.

Newborn Identification Forms

2-part Mother/Baby Band

Ident-A-Band

From delivery to discharge, let Hollister help ensure positive patient identification in your Labor and Delivery Room. Available in three styles, **Mother/Baby Father Bands** can help accommodate individual hospital requirements. This system helps improve accuracy of identification, reduces errors and liability for the hospital.

- Tamper evident and secure.
- Unique, pre-printed matching numbers link family members with baby.
- Water-resistant, non-elastic construction makes it impossible to remove without detection.
- Hollister will not repeat an identification number for five years.
- Waterproof, non-toxic ink pen included in each box of bands.

Hollister obstetrical **Ident-A-Band** products form the foundation of a complete line of patient identification bands. Call our **Customer Service Center** at **1.800.323.4060** for information about additional products.

Urine Specimen Collectors

U-Bag Urine Specimen Collectors

The **U-Bag** Urine Specimen Collectors are the first choice in convenience, protection and care for an infant's tender skin. This complete system of urine collectors features products to facilitate any infant urine collection need.

- Transparent butterfly patch makes application easy and accurate.
- Compatible and comfortable for male and female anatomy.
- Double chambered construction with no-flow back valve keeps urine away from skin to help prevent irritation.
- Adhesive patch can be folded in half to send sealed specimen to the lab.
- Premie size ideal for NICU use with low birth weight infants.

Meet any infant urine collection need.

First-Time Urine Specimen Collectors

The **First-Time** Urine Specimen Collectors were designed with extensive input from nursery and pediatric nurse clinicians. Use to obtain adequate urine specimens whenever a collector is applied.

- Features patented “bump” design for even simpler placement and reduction of fecal contamination.
- Compatible and comfortable with male and female anatomy.
- Special foam adhesive is gentle on baby’s sensitive skin.
- Double chambered construction with no-flow back valve traps urine away from skin to help prevent irritation.

Patented “bump” simplifies placement on the infant and helps reduce incidence of fecal contamination.

Birth Certificates

Welcome, celebrate & preserve.

Hollister Birth Certificates

For over 80 years **Hollister Birth Certificates** have been welcoming babies, preserving memories and bringing joy to families. It's customary to celebrate the birth of a baby by presenting a gift to the parents. What better than one that captures the details of the very event!

- Choose from a variety of styles and customize to your own specifications.
- All certificates are personalized with the hospital name, city, and state.
- Gold seals and satin ribbons also available.

Listed to the right are only some of Hollister's most popular styles of birth certificates. Call our **Customer Service Center** at **1.800.323.4060** for additional information on other options available for your hospital.

Ameda Breastfeeding Products

At the heart of breastfeeding.

SMB

At Hollister Incorporated, we rely on the input of nursing mothers and lactation professionals to help us develop effective breastfeeding products that meet the needs of today's active mothers. Almost 60 years ago, Einar Egnell was asked by leading Swedish gynecologists to improve upon existing breast pumps which were unsatisfactory in several ways. After years of research, Egnell achieved the breakthrough technology that enabled him to produce an electric piston style pump which closely mimics the sucking rhythm and intensity of nursing infants. The SMB Breast Pump, the first pump developed based on the Egnell research, today remains the gold standard in hospital grade breast pumps. The SMB and its descendants have earned a solid reputation for excellence in both performance and reliability and are available to mothers worldwide.

The piston technology developed and incorporated in all Ameda Electric Breast Pumps allow mothers the ability to mimic their baby's nursing pattern in a smooth rhythmic fashion not found in competitive diaphragm style pumps. The simplicity, comfort and efficiency found in every Ameda brand breast pump and accessory product affirms our commitment to quality.

Our Breastfeeding product line offers more than just trusted, quality products. Customer Service, Professional Education and Patient Support are all part of how Hollister has grown to be a trusted market leader that takes pride in its community support and strong relationships with customers and families.

ELITE

Hospital Grade Breast Pumps

Elite Electric Breast Pump

The **Elite** Electric Breast Pump provides hospital grade, computer-controlled technology to mothers in a variety of settings. The variable suction strength and cycling speed options are set independently of each other to accommodate a mother's personal comfort level and to closely simulate baby's nursing patterns.

- Compact and lightweight (only six pounds).
- Piston-driven pump.
- Convenient to carry.
- Easy to clean and operate.
- Compatible with any Ameda HygieniKit Milk Collection System.

Elite Carrying Bag

The sporty, lightweight nylon Elite Carrying Bag has a handle and detachable shoulder strap, plus a insulated cooling compartment with two freezer packs for storing expressed breast milk.

Elite Pump Rental Kit

The Elite Pump Rental Kit was specifically designed for mothers renting our Elite Electric Breast Pump. Features all personal use items a mother needs to get started pumping in one convenient kit.

SMB Electric Breast Pump
(available for rental only)

Still setting the standard for electric breast pumps for almost 60 years. The SMB was the first Ameda brand breast pump...and still is one of the most requested clinical breast pumps in hospitals today as a result of its performance and reliability.

- Piston-driven, maintenance-free operation
- Enduring design works with any Ameda HygieniKit Milk Collection System.

SMB Electric Breast Pump

Lact-e Electric Breast Pump

This quiet, 11-pound, piston-driven electric breast pump cycles at the speed of 1.25 seconds (48 cycles per minute). It comes with a protective cover (not shown) and built-in handle.

- Maintains suction intensity throughout the pumping session.
- Easy to clean and maintain.
- Compatible with any Ameda HygieniKit Milk Collection System.

Portable Electric Breast Pumps

Purely Yours Breast Pump

An ideal pump for mothers returning to full-time work, the Purely Yours Breast Pump offers the utmost in flexibility and portability. This value-packed, portable, piston breast pump creates a stimulation that feels both natural and comfortable. It provides numerous variations to mimic baby's suckling even as baby matures and grows.

- Operates on three power sources, including AC adapter, AA batteries or car adapter.
- Pump weighs only one pound.
- Eight adjustable suction levels and four cycle speeds.
- Separate Cool 'N Carry Tote safely stores collected milk for up to 10 hours.
- Personal hygiene product and should not be shared between mothers.

Manual Breast Pumps

One-Hand Breast Pump

This manual pump is so compact it fits into a purse or tote. The patented, easy-to-use design provides control and flexibility simply by varying the frequency and degree of the handle squeeze. The handle assembly eliminates the need for electrical outlets or batteries.

The one-hand design allows pumping of one breast while baby nurses on the other. Use two breast pumps to dual pump and save precious time. Mothers may also pump directly into any standard baby bottle or freezer bag.

- Eliminates the need for electrical outlets or batteries.
- Pump and nurse baby simultaneously.
- Use two pumps to dual pump.
- Can be used with the **Flexishield** Areola Stimulator (shown with the One-Hand Breast Pump) to provide increased stimulation.

One-Hand Pump Handle Assembly

Economically converts polycarbonate HygieniKit Systems into a One-Hand Breast Pump without the purchase of an entirely new kit.

Patented and easy to use.

Breastfeeding Kits

Everything needed to manually pump, store and transport collected breast milk conveniently packaged in an insulated lunch bag style tote.

- Striving to be a more “Baby Friendly” hospital? These Breastfeeding Kits make great alternatives to formula diaper bags!

Cylinder Breast Pumps

This classically designed, economical pump is one of the most effective two-handed pumps available. As the cylinder is drawn down, an effective suction is created that can be adjusted to a mother’s desired comfort level.

- Suction created by drawing the cylinder downwards.
- Reducing insert included for smaller breasts.
- Includes 94 mL/3 oz cylinder bottle.

FDA Clears Product Claim

*Protection from bacteria and viruses.**

“Breast Pumps...carry the same inherent risk of infection as other shared durable medical equipment”

Janet S. Kinney, M.D. Neonatologist, Dallas, Texas

Ameda Silicone Diaphragm

Our exclusive, patented **Ameda HygieniKit Milk Collection System***, used with all our electric breast pumps features a unique silicone diaphragm (right) that acts as a barrier, separating the user from the suction source.

The Food and Drug Administration (FDA) has reviewed and cleared the claim that the patented silicone diaphragm used in the Ameda HygieniKit Milk Collection System, creates a barrier that protects both...collected breast milk from potential contaminants, such as viruses and bacteria, that may be present in the pump or kit tubing and...pump and kit tubing from potential contaminants, such as viruses and bacteria, that may be present in collected breast milk.¹

Unlike filters used on other pumps or kits, the Ameda HygieniKit's patented silicone diaphragm acts as a two-way barrier.

(Purple coloration represents bacterial and viral contamination.)

Silicone diaphragm prevents potential contaminants in pump and tubing from entering collection bottle.

Silicone diaphragm prevents potential contaminants in collection bottle from entering tubing and pump.

“Mothers pumping for their own premature or ill infants who cannot breastfeed need to use extra caution in expressing, handling and storing of milk to assure optimal nutrition and immunological protection with minimal chance of contamination.”²

Human Milk Banking Association of North America, Inc.

1. “Note that the Ameda HygieniKit neither removes bacteria and viruses (Hepatitis B and C and Human Immunodeficiency Virus HIV) from the breast milk being collected into the collection bottle nor does the Ameda HygieniKit make it safe for infected mothers to feed their infants with milk collected using this device.” For the full viral barrier claim go to www.ameda.com.
2. Recommendations for Collection, Storage and Handling of Mother's Milk for Her Own Infant in the Hospital Setting, Third Edition, 1999, p iii

* This Viral Barrier Claim applies to Hollister Stock Numbers: 17121, 17126, 17131, 17101, 17111, 17070, 17075, 17077.

Milk Collection Systems

Reducing risk through clinical excellence.

Ameda HygieniKit Milk Collection System

Help mothers provide the purest milk possible to their babies. Our exclusive, patented **Ameda HygieniKit** is one of the most effective milk collection systems available today.

The unique silicone diaphragm acts as a barrier, separating the user from the suction source. This helps ensure milk purity by preventing contaminants from coming in contact with collected breast milk and prevents milk back-up into tubing.

The Ameda HygieniKit offers mothers the choice to single or dual pump and can easily convert to our One-Hand Breast Pump.

- Pre-assembled, Ready-to-Use.
- Attaches the same way to all Ameda pumps.
- Easy to clean, easier to re-assemble.
- Effortlessly converts to manual pump with the optional adapter.
- Clear plastic provides visibility and facilitates cleaning.
- Pump into any standard baby bottle or milk storage bag.

HygieniKit Adapter for Manual One-Hand Pump

Converts our Ameda One-Hand Breast Pump to a HygieniKit for electric single pumping.

HygieniKit Adapter for
One-Hand Breast Pump

Flange Customization

It's all about fit.

Custom Breast Flanges with Inserts

Perfect when a standard sized flange is too small for comfortable or effective pumping. This product provides mothers with a large flange with the insert in place or an extra large flange when the insert is removed.

- No special connectors needed.
- Compatible with all standard Ameda HygieniKit parts.
- Works with the Ameda One-Hand Breast Pump.
- Both large and extra large sizes included in one box.

Custom Breast Flange with Inserts

Flexishield Areola Stimulator

This comfortable, silicone insert fits the Ameda standard sized breast flange.

- Reduces shield size for maximum effectiveness with smaller breasts.
- Mimics the feel of a baby's mouth.
- Helps stimulate the let-down reflex.

Breast Shells and Shields

Short term interventions.

Breast Shells

Ameda Breast Shells protect nipples and help prevent soreness and irritation. They allow for air circulation while simultaneously preventing drip milk from leaking onto clothing when used with cotton rolls. The shells may also be used to help draw out flat or inverted nipples.

Two sets of backs included, one pair for sore nipples and one pair for inverted nipples.

Nipple Shield

This ultra-thin, flexible shield should be for short-term use only under the guidance of a healthcare professional.

- Encourages baby's latch on to the breast.
- May help bottle-fed babies return to breastfeeding.
- In special cases, cushions sore or sensitive nipples.

Breast Care

Soothe, heal and protect.

Nursing Pads

Until mothers establish their milk supply and a more regular feeding pattern, breast milk leakage can be a big concern. Our nursing pads can provide an easy, cost-effective solution to an embarrassing problem.

- Reusable nursing pads are made of 100% natural cotton.
- Machine washable.
- The multi-layer construction draws moisture away from skin.
- Disposable fiber pads also available.

Lansinoh Lanolin

Made with an exclusive process, this medical-grade lanolin soothes and helps heal cracked nipples.

- 100% Pure Lanolin.
- Safe and non-toxic for both baby and mother.
- Only product endorsed by La Leche League International.

Comfort counts.

ComfortGel Hydrogel Pads

These soft hydrogel pads provide cool, soothing relief for mothers who experience nipple pain or trauma associated with breastfeeding.

ComfortGel Hydrogel Pads provide a moist healing environment, help absorb leakage to keep skin healthy and help the nipple area remain dry between feedings. The low profile, contoured design fits discreetly under a nursing bra.

- Proven ability to ease nipple pain and help promote healing.³
- MVTR (Moisture Vapor Transmission Rate) helps reduce risk of maceration.
- Washable and may be used for up to six days.
- Provides significant cost savings when compared to similar products.

Milk Storage and Collection Containers

Specialty storage.

Milk Collection Containers

Simple, universal thread bottles for the collection and storage of breast milk. Compatible with most standard sized feeding nipples.

Mother's Milk Freezer Bags

More than just a storage bag, these multi-ply freezer bags resist splitting or cracking during freezing. Keeps freezer odors out and helps maximize freezer space.

Baby Cup

Developed by breastfeeding specialists in England, this feeding cup for expressed milk helps baby transition more easily to the breast.

- Ideal for use with premies and newborns.
- 2 oz. capacity, calibrated in milliliters and ounces.
- Airtight cover helps protect stored milk.

More than just products.

Part of Hollister Incorporated's mission states that "We will form strong relationships with our suppliers and distributors, and with the communities in which we work." We firmly believe that quality products play a vital role in the improvement of people's lives. However, we also recognize that the caregivers and professionals who use the products are just as essential in that improvement as the products themselves. To that end, Hollister offers customers educational opportunities and support materials to encourage ongoing development and growth in the area of MotherBaby Care.

We are proud of all we have to offer our clinical supporters and the mothers who use our products. Ongoing effort is made to bring new and innovative ideas to our customers in their quest for knowledge and quality of life. Programs and support we offer includes:

- On-site and regional Lactation Consultants and Clinical Specialists.
- Continuing Education Programs.
- Downloadable Breastfeeding Patient Education Sheets.
- Obstetric Product sample program for Medical Education Institutions.
- Local, Regional and National support of Breastfeeding and Obstetric Associations including ILCA, ICEA, La Leche League International and AWHONN.

Our commitment does not end with our customers but also reaches into our local communities. Hollister prides itself on our strength of character and values. Each and every year we show our commitment through support of community programs independent of our business. This is evident in our ongoing sponsorship of local educational programs, charity events and numerous non-profit organizations.

We will continue to offer new opportunities and programs to our customers in an effort to develop and strengthen our relationships. Hollister recognizes that our contribution to a patient's quality of care emanates not only from the products we provide, but also in how we support their providers.
